Its rating is (out of apossible 10 score and is rated thus over 2909) users. Over time, it has been through many iterations by the creators - some favorable and some not. Today, to enjoy Netflix VR is now the necessity used by MODS just to enjoy the app, which is sad. Today we give you opportunity to enjoy the app for free and your convinience. Netflix VR is an app that is uniquely compatible with Google's Daydream virtual reality viewing device, although it promises to be available on more platforms in the future. It allows you to watch television, movies and other Netflix fare (but mostly television and movies) with a regular Netflix subscription and all the benefits of VR. The blurry VisionAs VR app, Netflix VR unfortunately, has some minor drawbacks. Here's the bad news: there's some blurring when moving around, and it's hard to avoid ever doing so. There's also the issue of heating: our testing using an app created an uncomfortable level of heat, and other users' reviews seem to agree that this can happen. Now it's good news: it's still Netflix. It's still programming in the 70s, 80s, 90s, and good old in the early 2000s. There's more movies. It still has countless genres, special editions, and even exclusive rights. See for yourself Netflix VR, the image quality of the show is not as good as the big screen, which means that some people may still prefer a non-VR version of the app. But those who already own a VR device and have a Netflix subscription would be well served to give this app a try, especially as it develops, and enjoy Netflix's breathtaking catalog programming options. Basically, Netflix alone offers more content than many other apps combined, and no early adopter should miss out on that.Compatible with the following devices and technologies: Google Daydream ViewHuge selectionVery immersiveDaydream onlySome hiccups enjoy TV shows and movies, including award-winning Netflix original series, movies and documentaries, Daydream supported by Android Devices.With Netflix, you can watch everything you want anytime, anywhere. The more you watch, the better Netflix will be by recommending TV shows and movies that you like - just for you. There's even a section only for kids with family-friendly programs and movies.
